Questions:

- 1. Why do you want to continue in The IET SRM On Campus for the fiscal year 2020-21?**

Ans. SRM IET is one of the best club that I have ever worked for as I am newly joined in this club. So I want to work more and gain work experience to conduct the event, seminar and much more.

- 2. Write the name of all the events in which you have taken part as an organizer or volunteer and write the responsibilities assigned to you in detail.**

Ans. I took part in PATW competition I took part as an organizer I took work as an anchoring the event and also handled the powerpoint presentation during the event. And also helped in providing refreshments to participants.

- 3. Are you a part of any other team? If yes what is that one thing which you feel IET is good at doing than the other team and vice-versa?**

Ans. Yes. I am the member of other team basically IET has all the hardworking and skilled member they all are ready to work in any time and at any situation so basically I motivates me to work here with hardworking people.

- 4. Please mention your key role in every event in which you have taken part.**

Ans. I have newly joined IET so I have not worked much here I have only taken part in one event.

PATW Competition- I took work as an anchoring the event and also handled the powerpoint presentation during the event. And also helped in providing refreshments to participants.

5. How will you handle the responsibility of the post that you will be given, taking into consideration that you have placements, projects and other activities, which are equally important?

Ans. Yes I will prepare myself for that by considering that I have placements, projects and other activities. I will contribute in work days before the event and assign rest of the work to my juniors or to whom I trust so that 1 or 2 days before I will focus on my placement. I will try my best to complete most of the work by me and assigning rest of the work for my juniors. And before my placement and other activities I will also teach them how to handle immediate problems during event and about senior post work so that they will be much confident to handle that post or senior post for the next fiscal year. And I would tell them to do the same thing during their placement time.

6. What makes you stand apart from the rest of the people applying for the same post?

Ans. I have a positive attitude and I am time punctual in doing and completing things on time and I also don't give up much easily. Just for eg: if during an event if problem arises that we have event from 11am in morning and at 10am I received call from shop that due to some technical issues we are not able to provide refreshments for participants. So in this case I will try to contact other shops in potheri or near college and arrange some alternative items for refreshments of participants. I would ask 1 or 2 people for help and would try my best to solve problem among few members without letting knowing problem to my seniors.

7. If appointed to the post you desired, what are the changes that you would introduce within the Chapter?

Ans. (1) I would mainly keep active, skilled members in the club because they will be always ready to work at any situation and at any point of time.

(2)I will keep a watch on all members who are working actively and not giving excuses.Whereas removing repeated non active members and those who are not helping,participating or contributing in event.

(3)Conducting some new events in IET like quiz competition, Tech competitions etc apart from hackathon,Coding competition and hackquest.

8. Suppose if you don't get the post that you've given your choice for, earlier then in that case will you be ready to continue in SRM IET On Campus with the post allotted to you? (Whether the answer is in affirmation or negation, kindly provide a detailed response to this)

Ans.Yes I will work in SRM IET if I didn't get my desired position because my seniors are there to decide that I am capable or not.Afteral I am working with them and they know all my prones and cones.If I didn't get selected than I will ask them where I am lacking and work hard and try my best to achieve my future positions and endeavours.

9. If you wish to tell anything apart from what has already been asked in this form earlier then feel free to write it down below.

Ans. Nothing to ask

Thank you so much for your time and response! We wish you good luck for upcoming fiscal year!

Note: Final results of the posts that you may serve in SRM IET On Campus for next fiscal year (2021-2022) will be solely given at the discretion of faculty coordinators. Apart from your contribution in

the chapter there might be other aspects as well which may be judged by them to come up with the final results.

Good luck!
